4C

[www.4cinsights.com](http://www.4cinsights.com)

4C is a data science and advertising software company, headquartered in Chicago, USA. In 2011, Dr. Alok Choudhary founded the company to leverage his data science and build new technology for social advertising. In 2013, it acquired social intelligence platform The Echo System to deliver enhanced insights for brands using social data. In 2015, it acquired Teletrax from Civolution to create the most comprehensive global platform for Social and TV advertising. Teletrax owns and operates the world's largest TV monitoring network for TV analytics and TV-synced advertising, built and managed from its Eindhoven office. Teletrax originally spun-off from Philips in 2008.

---

## Aalberts Industries

[www.aalberts.com](http://www.aalberts.com)

Aalberts Industries NV is an Industrial Group listed on the Amsterdam Stock Exchange and serves various markets worldwide. Aalberts Industries Semicon & Science is a technology partner for the global Semiconductor and Research & Science market. Some of the key technologies and companies in Semicon & Science are:

- Vibration Isolation, IDE
- High Purity Piping Products, Lamers High Tech Systems
- Vacuum Technology, Mogema

The divisional headquarters as well as Semicon & Science management are located at High Tech Campus Eindhoven.

---

## ABB

[www.abb.com/evcharging](http://www.abb.com/evcharging)

ABB is leading with web-connected charging infrastructure for electric vehicles, supporting all EV standards. ABB offers a total solution: specific charging solutions for any location type and connected services to enhance your business. The chargers easily connect to any service or payment application. ABB's Internet connected chargers enable fast global service and pro-active maintenance. ABB has years of experience in creating, installing and maintaining charging infrastructure, including several nationwide charger networks. The ABB Group of companies operates in around 100 countries and employs about 150,000 people.

---

## Abyor

[www.abyor.com](http://www.abyor.com)

ABYOR International is an official SAP Gold partner. Founded and managed by SAP professional, ABYOR International is focusing its business in optimizing SAP Operations and Supports as well as deploying SAP Business All in One solution.

---

## Accenture

[www.accenture.com](http://www.accenture.com)

Accenture is a leading global professional services company, providing a broad range of services and solutions in strategy, consulting, digital, technology and operations. Combining unmatched experience and specialized skills across more than 40 industries and all business functions - underpinned by the world's largest delivery network - Accenture works at the intersection of

business and technology to help clients improve their performance and create sustainable value for their stakeholders. With more than 358,000 people serving clients in more than 120 countries, Accenture drives innovation to improve the way the world works and lives.

---

## AKKA Netherlands

[www.akka-technologies.com](http://www.akka-technologies.com)

AKKA Netherlands is the Dutch subsidiary of the AKKA Technologies Group, an international engineering consultancy company founded in France in 1984 with more than 13 200 employees. Together with AKKA Belgium, we consist out of 800 experts who have been supporting the major businesses in the industry for more than 20 years. Our teams are involved in large-scale industrial projects in 4 main industrial sectors: Transports, Life Sciences, Industrial Products (High-Tech, Industrial Equipments) & Industrial Services (Exploitation of any kind of services and networks such as Energy, Gas, Telecom, Infrastructure...). In the Netherlands, our focus is on the High-Tech and Automotive sectors.

---

## Amber

[www.ambermobility.com](http://www.ambermobility.com)

Amber is a next-generation car-sharing platform. Powered by intelligent demand-predicting software and using cars designed specifically to be shared, Amber provides guaranteed, on-demand mobility at all times and within walking distance.

---

## ams Netherlands

[www.ams.com](http://www.ams.com)

ams develops and manufactures high performance analog semiconductors that solve its customers' most challenging problems with innovative solutions. ams' products are aimed at applications which require extreme precision, accuracy, dynamic range, sensitivity, and ultra-low power consumption. ams' product range includes sensors, sensor interfaces, power management ICs and wireless ICs for customers in the consumer, industrial, medical, mobile communications and automotive markets. Employing more than 7,000 overall, ams operates direct sales offices in all major regions of the world. It has a network of channel partners around the globe, including its worldwide distribution partners DigiKey, Future Electronics and Mouser.

---

## AOMB IP Consultants

[www.aomb.nl](http://www.aomb.nl)

Success is dependent on people with ideas. Continuous development and innovation are essential to success. You will therefore want to carefully protect your ideas. That way you can prevent third parties from being allowed to produce, sell or use your product, procedure or device. AOMB IP Consultants specializes in protecting your ideas and creativity against counterfeiting and reproduction, to enable you to turn your ideas into a success. Whether you are a start-up, a small/ medium sized company or an internationally operating enterprise. Whether your idea involves a design, a technical innovation or a trademark.

---

## Analog Devices

[www.analog.com](http://www.analog.com)

Analog Devices, Inc. (NYSE: ADI) is a global Semiconductor company headquartered in Massachusetts, USA. ADI defines innovation and excellence in signal processing. ADI's analog, mixed-signal, and digital signal processing (DSP) integrated circuits (IC) play a fundamental role in converting, conditioning, and processing real-world phenomena such as light, sound, temperature, motion, and pressure into electrical signals to be used in a wide array of electronic equipment. We collaborate with our customers to define the very best in the quality of the user experience. That means the clearest image, crispest sound, and optimum interface, size and performance in thousands of entertainment, medical, communications, industrial and other applications.

---

## Anderis BV

[www.anderis.nl](http://www.anderis.nl)

Anderis is a Service Provider for the High Tech Industry in the Eindhoven Region. Helping clients to reach their goals by supporting them with high quality concepts and people, by continuous improvement of technical knowledge and personal skills. Performing in-house projects and on location within the area of software testing, Embedded Software Testing, Equipment Testing, Engineering and Quality. Our customers can rely on optimal results from partnership, commitment and our expertise in a society which is increasingly depending on complex systems. Anderis contributes to the optimal functioning of these systems by working together, team up with our customers, employees and partners in being part of a strong community. Our way: no-nonsense, authentic, honest, tell it like it is, human, stay close to yourself, accessible. Continue to innovate, continue to stimulate, challenger of the status quo, embrace new insights, renew continuously in approach, challenge yourself (development), keeping the subject sharp.

---

## Antenna Company

[www.antennacompany.com](http://www.antennacompany.com)

Antenna Company is an antenna systems provider that delivers high-performance 2D and 3D solutions based on advanced materials, proprietary design principles and RF system expertise. Our patented technology results in clearly differentiated performance over conventional antenna solutions in the market. Our mission is to solve difficult antenna system issues for existing and next generation wireless standards. We provide standard and customized solutions to leading OEMs and ODMs for Wi-Fi, GPS, Cellular and other wireless technologies. Antenna Company has a design center in the Netherlands with sales offices in the US and Asia. The company is headquartered in Willemstad, Curaçao.

---

## Anteverta-mw B.V.

[www.anteverta-mw.com](http://www.anteverta-mw.com)

Anteverta-mw is pioneer of large signal device characterization methodologies and systems, and high efficiency/linearity PA design. Anteverta's patented IP allows non-50Ω characterization at speeds up to 100x faster than traditional systems, and is unique in its capability of wideband impedance control for realistic modulated signals.

From our offices in Eindhoven, the Netherlands, we offer measurement and modeling device characterization services to European and international customers, with an emphasis on high-speed nonlinear load pull and behavioral modeling.

---

## Aquantia

[www.aquantia.com](http://www.aquantia.com)

Aquantia is a pre-IPO semiconductor company and the leader in high-speed Ethernet connectivity solutions for data center, mobile and enterprise markets. As the number one supplier of 10GBASE-T PHYs (10Gigabit Ethernet over copper) in data centers, Aquantia has been consistently the first in the industry to deliver the technology in all process nodes and all port configurations, including the world's first and only 10GBASE-T MAC/PHY device for servers. Aquantia has further expanded its leadership into the Enterprise Wireless LAN Access Points (WLAN APs) and Campus LAN switches with its flagship AQrate product line, allowing transport of multi-Gigabit Ethernet over Cat5e/Cat6 copper cables. The company is headquartered in Silicon Valley, California, with satellite R&D offices located in Eindhoven, the Netherlands, in Russia and India. Aquantia currently has 140+ employees.

---

## ARTEMIS Industry Association

[www.artemis-ia.eu](http://www.artemis-ia.eu)

ARTEMIS Industry Association is a non-profit association for European R&I actors and private partner in the ECSEL Joint Undertaking. ARTEMIS supports formation of consortia and initiation of project proposals for joint collaboration and creates the meeting place where key industry players and other R&I actors identify strategic high priority topics for collaborative R&I projects. The association represents an influential network of organisations focused on the innovation and development of Embedded Intelligence in Europe.

---

## ASML

[www.asml.com](http://www.asml.com)

ASML is one of the world's leading providers of lithography systems for the semiconductor industry, manufacturing complex machines that are critical to the production of integrated circuits or microchips. Headquartered in Veldhoven, the Netherlands, ASML designs, develops, integrates, markets and services these advanced systems, which continue to help our customers – the major chipmakers – reduce the size and increase the functionality of microchips, and consumer electronic equipment.

---

## Astrata Europe BV

[www.astrata.eu](http://www.astrata.eu)

Astrata Europe, is a wholly owned subsidiary of Astrata Group Private Limited. Formerly known as Qualcomm, for over 25 years Astrata delivers added value solutions for more effective fleet management for transport and logistics companies of all sizes, enabling them to provide safe, sustainable and cost-effective transport and logistics services. Having the broadest range of the telematics services anywhere with proven, highly robust and reliable products and mobile units being shipped to over 500 customers in Europe alone, Astrata provides both the vital facts needed for optimisation of

fleet efficiency and cost reduction, as well as the IT consultancy for seamless integration of telematics with other back-office systems.

---

## Avanade

[www.avanade.com](http://www.avanade.com)

Avanade helps clients realize results in a digital world through business technology solutions, cloud and managed services that combine insight, innovation and expertise focused on Microsoft technologies. Our people have helped thousands of organizations in all industries improve business agility, employee productivity and customer loyalty. Avanade combines the collective business, technical and industry expertise of its worldwide network of experts with the rigor of an industrialized delivery model to provide high quality solutions using proven and emerging technologies with flexible deployment models—on premises, cloud-based or outsourced. Avanade, which is majority owned by Accenture, was founded in 2000 by Accenture LLP and Microsoft Corporation and has 29,000 professionals in more than 20 countries.

---

## Averna BV

[www.averna.com](http://www.averna.com)

Averna is a leading Test Engineering company in the world, specialized in vision inspection and precision assembly. Averna is a strategic partner for electronic and communication product developers, helping them achieve higher product quality, faster time to market, and greater value from their test systems. Founded in 1999, Averna offers specialized expertise and innovative test solutions that deliver substantial financial, technical and brand benefits for hundreds of clients in the aerospace, automotive, consumer electronics, defense, life sciences, telecom and transportation industries. Averna has offices around the world, numerous industry certifications such as ISO, CSIA, and ITAR registration, and is partnered with National Instruments, Keysight Technologies, and JOT Automation.

---

## Axxerion

[www.axxerion.com](http://www.axxerion.com)

Axxerion offers an integrated environment for workplace and facility automation via Internet. It enables employees, partners, customers and suppliers to share information and collaborate on business processes via Internet. Axxerion includes modules for CRM, request management, project management, property management, asset management, reservations, maintenance, purchasing, contract management and human resource management. The built-in workflow management module enables customers to define custom business processes without programming. The software is hosted by Axxerion and offered to customers via the Software as a Service (SaaS) model. Customers only need a web browser and do not need to invest in hardware, software or maintenance. The software is licensed based on an annual subscription model where customers only pay for what they use. Axxerion is used by customers in Europe and the USA in a variety of business sectors including industry, healthcare, insurance, government, construction, education and telecommunications.

---

## BAM Bouw en Techniek Industrie

[www.bambouwentechiek.nl](http://www.bambouwentechiek.nl)

BAM Bouw en Techniek is an integration between BAM Techniek and BAM Utiliteitsbouw. As a leading integral knowledge company, BAM Bouw en Techniek develops, builds, maintains and operates architectural and/or technical installations. The integration of construction and engineering, ensures that we think along with customers and turn the questions and requirements into possibilities and complete solutions. Above all, our strength is that we use our knowledge, insight and experience of the entire life cycle of a building and dedicate this to our customers. As a result, we provide the highest possible contribution to your return. Our mission is to be your life cycle partner. BAM Bouw en Techniek is a subsidiary of Koninklijke BAM Groep.

---

## Bambi Medical

[www.bambi-medical.com](http://www.bambi-medical.com)

Bambi Medical is a med-tech startup company changing the way of premature baby monitoring. Our product the Bambi-Belt, is a skin-friendly wireless vital signs monitoring device. It effectively measures critical data such as temperature, respiration and cardiac function (ECG), while eliminating the pain and skin irritation caused by adhesive electrodes - used nowadays for premature baby monitoring. As no wires are involved the baby can be more easily taken out of the incubator, handled and cared by parents. This allows for optimal Kangaroo Mother Care, which has major beneficial effects on both mother and her baby.

---

## Berendsen

[www.berendsen.nl/esd](http://www.berendsen.nl/esd)

Berendsen is a laundry company for controlled environments and is also highly focused on the ESD/Micro Electronics (M.E.) segment. We offer solutions for cleaning and leasing textiles used in several ESD/M.E. environments. We are not only thinking of the textiles itself, but also on the requirements a customer needs to meet within the ESD/M.E. segment. Therefore, we developed a service wherein the options exist whether there should be measurements involved, how many measurements, how the documentation have to be delivered and how often. Meeting the requirements, which customers have, is what we make sure. Furthermore, we also provide textiles and related articles to cleanrooms within several sectors.

---

## Bionchip Technologies

[www.bionchip.com](http://www.bionchip.com)

Bionchip Technologies is a company that matches application needs in de field of Life Sciences with enabling technologies from thin film/ Micro Systems Technology. The focus is on Life Sciences applications with cells/tissue or droplets. Product examples are organ-on-chip, Multi-electrode arrays, microfluidics based chip-plates amongst others. Bionchip aims to support customers in realising their products.

---

## Biotech Systems Platform

[www.bsp-platform.nl](http://www.bsp-platform.nl)

The Biotech Systems Platform (BSP) stimulates innovation and cooperation between companies and knowledge providers active in the bio-life-tech and high-tech domains. The platform provides grants, advice and coaching in a network setting. Financial support and government grants are available to support the first contacts. Companies active in fundamentally different domains are brought together to enable innovation and long-term growth.

---

## Bloomlife

[www.bloomlife.com](http://www.bloomlife.com)

Bloomlife is a women's health technology company focused on improving the health of moms and babies. With its smartphone-connected sensor and app Bloomlife puts clinically validated information into the hands of expecting parents starting with a better way to visualize and track contractions. By crowdsourcing the largest and most comprehensive dataset on maternal and fetal health parameters the company hopes to accelerate long overdue advancements in women's healthcare with a better understanding of pregnancy complications such as preterm birth.

---

## Blue Engineering

[www.blue-engineering.nl](http://www.blue-engineering.nl)

Blue Engineering is a young, experienced team of engineers who work on innovations together with clients and design them in a sustainable way. Young in spirit and ambition, very experienced in technical projects. The engineers specialize in mechanics, mechatronics and electrical engineering and they work on both internal and external projects. Blue Engineering knows that ambitious engineers enjoy working on groundbreaking innovations, which are sustainable. Blue means we are inspired by Gunter Pauli's Blue Economy. No sub optimization for us; we look at the whole picture, add value, simulate on the basis of reality and conduct life cycle analyses.

---

## Blue Innovation

[www.blue-innovation-center.nl](http://www.blue-innovation-center.nl)

Blue Innovation combines the philosophy of Gunter Pauli's Blue Economy with high-tech start-up companies who bring their sustainable innovations quickly to the market. The Blue Innovation Center in Venlo as well as the Blue Accelerator at the High Tech Campus are buildings with facilities for R&D companies, creatives and marketers. These different minds inspire each other and crossover events are organized to create internal as well as external buzz. The goal of Blue Innovation is to create 100 ideas in five years, which result in 20 new projects or companies and 250 highly qualified jobs.

---

## BOM Foreign Investments

[www.foreigninvestments.eu](http://www.foreigninvestments.eu)

BOM Foreign Investments provides a wide range of services to help foreign companies reach their European customers via the Netherlands and the province of Brabant, gaining the best return on investment. Whether developing a first European presence or

optimizing existing European operations, companies can obtain information, strategic perspective, personal guidance and practical assistance from our business professionals. Over the years, BOM has helped hundreds of foreign companies – confidential and free of charge- initiate or expand operations in Brabant.

---

## Braingut foundation

[www.braingutfoundation.com](http://www.braingutfoundation.com)

The ability of the brain to communicate with the gut microbiota is emerging as an exciting and promising concept in modulating health. The Brain Gut Foundation aims to promote and evaluate scientific research on the study of the microbiome-gut-brain axis. Treatments of children and juveniles can be more effective using scientific knowledge of the brain – gut relation. The foundation, is being supervised by a Scientific Council to ensure academic rigour. The data are obtained by clinical child neuropsychologists and other experts following a standardized protocol. The brain-gut assessment protocol as well as the treatment are (partially) subsidized by the Foundation.

---

## Bright Cubes BV

<http://brightcubes.nl/>

Bright Cubes delivers consultancy and engineering to prepare companies towards becoming a Digital Business. We focus on cloud automation & orchestration, software development and information management & analytics. Our consultants are Cloud Engineers, Front-end & Back-end software designers and Information Managers and Analysts. Bright Cubes migrates traditional IT to IT that actually delivers value to your business and core processes. Ask us what we can do for you.

---

## Bright Society

[www.bright-society.com](http://www.bright-society.com)

Bright Society is a talent incubator, facilitating young Bright people to boost their early career. During a 3-year program these young academics, all with a PhD degree, discover their passion and talent. Through intensive guidance, facing challenges in a variety of companies they experience true inspiration.

---

## Brunel

[www.brunel.nl](http://www.brunel.nl)

As an international leader in flexible deployment of professionals, people are at the heart of everything we do. Brunel Nederland is part of Brunel International, which operates with more than 100 offices in 35 countries. We offer business services in the field of Engineering, IT, Legal, Finance and Marketing. Our aim is to help both our clients and consultants achieve the very best results, every single day. Our experience, knowledge and ambition truly provides "Access to Excellence".

---

## BT Nederland NV

[www.bt.com/globalservices](http://www.bt.com/globalservices)

BT's purpose is to use the power of communications to make a better world. We are one of the world's leading providers of communications

services and solutions, serving customers in 180 countries. Our principal activities include the provision of networked IT services globally; local, national and international telecommunications services to our customers for use at home, at work and on the move; broadband, TV and internet products and services; and converged fixed-mobile products and services. We have more than 25 years of local experience in the Benelux region, serving around 400 customers, including many major brands and public sector organisations.

---

## byFlow

[www.3dbyflow.com](http://www.3dbyflow.com)

byFlow is a company specialized in 3D printing since 2009 and an expert in the field of 3D food printing. We are on a mission to change the way people prepare and experience food, by enabling them to create customized shapes and textures that were not possible before. Therefore we developed the Focus 3D Food Printer - a compact, portable and multimaterial 3D Printer, which is easy to maintain and use. Our product has quickly entered the growing 3D food printing industry and is now used by more and more chefs and chocolatiers, while gaining interest of multinational food companies and R&D facilities as well.

---

## Capgemini

[www.capgemini.com](http://www.capgemini.com)

Capgemini, one of the world's foremost providers of consulting, technology and outsourcing services, enables its clients to transform and perform through technologies. Capgemini provides its clients with insights and capabilities that boost their freedom to achieve superior results through a unique way of working, the Collaborative Business Experience™. The Group relies on its global delivery model called Rightshore®, which aims to get the right balance of the best talent from multiple locations, working as one team to create and deliver the optimum solution for clients. Present in more than 30 countries, Capgemini reported 2009 global revenues of EUR 8.4 billion and employs 90,000 people worldwide.

---

## Care IQ

[www.care-iq.com](http://www.care-iq.com)

Care IQ is a healthcare consultancy company that collaborates with care providers, health insurers and medtech companies to create innovative concepts for smart care to patients and their families. Care IQ partners bring in a wealth of experience with on average more than 25 years in the healthcare sector and share a large global network. At Care IQ we pride ourselves in offering innovative and pragmatic solutions and services for a wide range of current challenges in healthcare. This includes care facility and patient pathway design, clinical process improvement, dynamic capacity management, advanced healthcare analytics services, medtech innovation acceleration services, organizational development and change acceleration.

---

## Chaos2Work BV

[www.chaos2work.com](http://www.chaos2work.com)

Chaos2Work gets the best out of your organisation. A lot of organisations restructure and redefine their company processes to improve performance, only to find out that it is still not working. Top down management may have worked in the 20th century but not anymore. Companies have to break the cycle of endless restructuring and put the collective intelligence of their people to work. Only this will give a company the competitive edge it needs to move forward. Chaos2Work gives insight into how people react to challenging and changing situations, enabling the organisation to achieve outstanding results.

---

## Chassis Brakes International

[www.chassisbrakes.com](http://www.chassisbrakes.com)

Chassis Brakes International is one of the world's three largest manufacturers of automotive braking solutions. Its products, which include solutions as brake calipers, disk brakes, drum brakes, and parking brakes, are dedicated to original equipment manufacturers and various aftermarket channels. The company has successfully served its customers, the global vehicle manufacturers, for more than 90 years. Chassis Brakes International has a global footprint operating in 5 continents: the company employs 5,500 people at 27 manufacturing facilities and engineering centers in Europe, Asia, Australia, South Africa, North and South America.

---

## Chematronics

[www.chematronics.nl](http://www.chematronics.nl)

Chematronics 'fuels your innovation'. We do what is necessary to achieve excellent results in a challenging innovation environment. In that sense, you can say that we are "somewhat strange advisors". We initiate, create, evaluate, realize and fund innovation & business challenges. With our experience and methodology, we are able to provide short term business development results, while structurally improving your business development capabilities. Our focus is specifically on you, as an innovative high-tech SME entrepreneur, and your management team. Since 2007 our team of advisors is ready to make a difference for you.

---

## Cognizant Technology Solutions Benelux

[www.cognizant.com](http://www.cognizant.com)

Cognizant (NASDAQ: CTSH) is a leading provider of information technology, consulting, and business process outsourcing services, dedicated to helping the world's leading companies build stronger businesses. Headquartered in Teaneck, New Jersey (U.S.), Cognizant combines a passion for client satisfaction, technology innovation, deep industry and business process expertise, and a global, collaborative workforce that embodies the future of work. Follow us on Twitter: Cognizant.

---

## Coöperatie Topinc

[www.topinc.nl](http://www.topinc.nl)

TOPINC is as a cooperation of independent supply chain specialists unique in the Netherlands. What they have in common is that they want to make the Dutch manufacturing industry more competitive. This means that entrepreneurs work for entrepreneurs. We understand, especially when you get 60% of your revenue supplied, that your purchasing must be in good order. We call it #smartsupply. That's why #smartsupply fits seamlessly with #smartindustry.

---

## Cordis Automation

[www.cordis.nl](http://www.cordis.nl)

With our CORDIS-SUITE we offer a novel Model-Driven Software Engineering (MDSE) solution, that facilitates the fastest way to create reliable software-controlled systems. The CORDIS-SUITE supports the software engineering process in all development phases. In the design-phase, domain and system experts together, define the detailed system behavior using the CORDIS-Modeler. The intuitive graphical description language (UML subset) enables easy & open communication in the multidisciplinary team. Using automatic code generation will give you the fastest and defect free translation of your created design-model to software-code. In the commission-phase any team member can work intuitive to verify the system using the test & diagnose CORDIS-Dashboard.

---

## Corporate Vitality

<https://www.campushealth-sportsclub.nl/nl/>

These days, working mostly implies sitting at your desk behind a computer screen. More than ever office staff need to stay healthy and active. The Campus Sports & Health Centre in the Frits Philips Sport Bos is the ideal spot to improve your health and level of physical activity by way of a personal approach. With the expertise of certified outdoor and indoor trainers, inspiring events and health services, Corporate Vitality will guide you into an inspirational environment at the Campus.

---

## CyNergy Consulting

[www.cynergy-consulting.com](http://www.cynergy-consulting.com)

We operate in the spirit of the "One Belt & One Road" development strategy and framework proposed by Chinese President Xi Jinping in 2013. Part of this strategy is to vigorously promote the development of the high-tech (e.g. semiconductors) industry in China. We also leverage our expertise and network to support European companies in developing their business in China. We are committed to foster the cooperation between the leading Chinese enterprises and European cutting-edge high-tech companies, to meet the global needs.

---

## Dassault Systèmes

[www.3ds.com](http://www.3ds.com)

Dassault Systèmes, the 3DEXPERIENCE® Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world

to improve the real world. The group brings value to over 170,000 customers of all sizes in all industries in more than 140 countries.

---

## Delite Interactive

[www.delite.nl](http://www.delite.nl)

Delite Interactive is your partner in user interface design and software development. Custom software solutions, where design meets technology and technology meets design. Delite is your partner working on your website, mobile app or any other multichannel communication application. All connected and always online. Delite speaks the language of the cloud and has a strong R&D. Internet and Internet of Things is in our veins. Delite – developing the future. Delited to meet you.

---

## DSP Valley

[www.dspvalley.com](http://www.dspvalley.com)

DSP Valley is an independent cluster of excellence in smart electronic systems and embedded technology solutions. DSP Valley groups 100+ members: universities, research institutes and companies, from small start-ups, over SMEs to large international groups with a local R&D activity. DSP Valley offers its members a networking platform that allows them to explore each other's expertise and that stimulates innovation by exploiting complementarities.

The activities of DSP Valley include regional and international B2B forums, custom matchmaking events, technical seminars and brokerage services for participation in European ICT programs. DSP Valley is headquartered in Leuven, Belgium and has a branch office in Eindhoven, The Netherlands.

---

## Duthler Associates

[www.duthler.nl](http://www.duthler.nl)

Duthler Associates is an organisation that specializes in law, IT and organisation, and more specifically in privacy and data protection. Part of Duthler Associates is Duthler Academy. This institute provides for training in the fields that Duthler Associates specialises in, such as a data protection officer (DPO) course, Speed Up courses Business and Legal and Privacy Awareness-raising. Duthler Associates has developed the SBC management and accounting system to build and maintain records of processing, data breach registers and research accounting for organisations and institutions. Duthler Professionals, a subsidiary of Duthler Associates, provides external data protection officers. These professionals are seconded by Duthler Professionals on the basis of profile, requirements and demands of the client (these may flow forth from the organisation and the sector in which the organisation operates).

---

## DXC Technology

<http://www.dxc.technology>

DXC Technology helps clients harness the power of innovation to thrive on change. For more than 60 years, we have successfully guided the world's largest enterprises and government agencies through successful change cycles. We take pride in our technology independence and our role as a trusted advisor. Our deep experience

gives us a clear and confident vision to help clients navigate the future. As the world's leading independent, end-to-end IT services company, we are uniquely positioned to lead digital transformations – creating greater value for clients, partners and shareholders, and presenting growth opportunities for our people. We are among the world's best corporate citizens.

---

## ECN

[www.ecn.nl](http://www.ecn.nl)

A transition to a sustainable energy system is needed. The Energy research Centre of the Netherlands (ECN) is one of Europe's largest energy research organizations with approximately 550 employees. It has a strong international position on the items solar energy, wind energy, biomass, policy studies and sustainable process and heat technology. ECN develops knowledge and technology together with and for the market enabling a transition to a sustainable energy system. Special attention is paid to reducing energy demand through energy efficiency, energy generation using sustainable resources and efficient and clean use of fossil fuels (the so-called 'trias energetica'). ECN focuses its research on sustainable energy generation to develop safe, efficient, reliable and environmentally friendly energy systems. Also ECN conducts research on future opportunities and economic backgrounds related to energy.

---

## EIT Digital

[www.eitdigital.eu](http://www.eitdigital.eu)

EIT Digital is a European innovation and entrepreneurial education organisation that stimulates the digital transformation in Europe for economic growth and quality of life. EIT Digital delivers digital innovations to the market and educates entrepreneurial talent in the EIT digital Academy including a Master-, Doctoral- and Professional School, and online learning. It does all this by mobilising a pan-European ecosystem of over 130 top European corporations, SMEs, start-ups, universities and research institutes. EIT Digital invests in strategic areas to accelerate the market uptake of research-based digital technologies focusing on societal challenges: Digital Industry, Digital Cities, Digital Wellbeing, Digital Infrastructure and new since 2017 Digital Finance.

---

## Elision

[www.elision.eu](http://www.elision.eu)

Our specialties are: B2B and B2C commerce solutions, Product Content Management (PCM), PIM, In-store commerce, Mobile commerce, E-business. Elision is a SAP partner and part of the Xplore Group.

---

## Etulipa

[www.etulipa.com](http://www.etulipa.com)

Etulipa introduces reflective outdoor screens that read like paper, but offer all the advantages of digital: real-time, targeted, on-the-spot advertising. We transform the world of outdoor digital advertising. Its proven electro-wetting display technology (EWD) has comparable visual characteristics as the incumbent paper of vinyl billboards, but displays digital dynamic content, including low frame-rate animations and video. Since EWD uses the same principle of light reflection as paper or vinyl, it offers proven visual perception required for advertisements by brands in all light conditions. Reflective screens are very energy-efficient, do not cause any light pollution and are perfectly readable in bright sunlight.

---

## Exes Group

[www.exes-group.com](http://www.exes-group.com)

Exes Group provides outsourcing of engineering all over the world. We do this from our outsourcing locations in South-America and Asia. Having over ten years of experience in outsourcing engineering, Exes Group has the knowledge, contacts and experience to deliver the established quality. Our good relationships make it possible to always provide our customers with the best price-quality ratio.

---

## Expat Spouses Initiative

[www.expatspousesinitiative.org](http://www.expatspousesinitiative.org)

Across the globe, international careers that span several countries are becoming more commonplace. More and more employees are being recruited from outside the country, and they often bring their partners with them. This accelerated mobility of highly-skilled international professionals should generate a response, and be supported by the local "host" environment. Expat Spouses Initiative (ESI) is one such creative outside-of-the-box response that supports international professionals locally. ESI is a bottom-up, community-driven movement that connects the highly-skilled partners of international employees with local opportunities.

---

## EY + EYnovation

[www.ey.com](http://www.ey.com)

EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital market and in economies over the world. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In doing so, we play a critical role in building a better working world for our people, for our clients and for our communities. EYnovation™ supports entrepreneurs in their growth to market leadership. EYnovation™ offers startups and scaleups quick and easy access to EY's network and services. Next to that, EY is actively involved in several activities in the region, such as accelerator programs HighTechXL, Brightlands Innovation Factory and PortXL and also in initiatives like StartupAmsterdam, Yes!Delft, ACE Venturelab and StartupDelta.

---

## FARO Benelux B.V.

[www.faro.com/benelux](http://www.faro.com/benelux)

Being the world's most trusted source for 3D measurement technology FARO develops and markets portable CMMs (coordinate measuring machines) and 3D imaging devices to solve dimensional metrology problems. Technology from FARO permits high-precision 3D measurement, imaging and comparison of parts and compound structures within production and quality assurance processes. The devices are used for inspecting components and assemblies, production planning, documenting large volume spaces or structures in 3D, and more. FARO's 3D measurement technology allows companies to maximize efficiencies and improve processes.

---

## Faulhaber Benelux BV

[www.faulhaber.com](http://www.faulhaber.com)

FAULHABER is an independent family-run group with its headquarter near Stuttgart, a high technology region in Germany. Founded in 1947 FAULHABER offers today the most extensive range of miniature and micro drive systems worldwide. FAULHABER drive solutions are unique with respect to their precision and reliability in the smallest of spaces. Their main areas of use include production automation and robotics, aerospace, optical systems as well as medicine and laboratory equipment. At present, FAULHABER employs more than 1,600 people around the globe. In 2015 our new sales & support office for the Benelux countries opened at HTC 9.

---

## FME

[www.fme.nl](http://www.fme.nl)

FME wants to strengthen the position of technological industry in the Netherlands, internationally as well as nationally, by means of a vision, lobbying, advice and services designed to improve the competitiveness of its members, and by positioning the sector optimally and assuring its continuity. ## OMT Solutions

[www.omtsolutions.com](http://www.omtsolutions.com)

OMT Solutions is an R&D led technology company providing services and products for the optical industry, semiconductor industry, glass and coating industry, solar energy industry, universities and R&D institutes. Our focus is on optical characterization of materials, for which we provide customised measurement solutions, accessories for spectrophotometry, training and consultancy. We also provide a measurement service and support in the development of new optical materials and coatings. Our facilities include spectrophotometers and tools that enable us to perform various optical measurements in a wavelength range between 175 nm and 56,000 nm, covering the entire solar energy and thermal radiation range. Our mission is to support the Industry and Scientific Community with world class innovative solutions for optical measurement and testing problems and the development of new optical materials and products.

---

## ON Semiconductor

[www.onsemi.com](http://www.onsemi.com)

ON Semiconductor (Nasdaq: ONNN) is driving energy efficient innovations, empowering design engineers to reduce global energy use. The company offers a comprehensive portfolio of energy efficient power and signal management, logic, discrete and custom solutions to help customers solve their unique design challenges in automotive, communications, computing, consumer, industrial, LED lighting, medical, military/aerospace and power supply applications. ON Semiconductor operates a responsive, reliable, world-class supply chain and quality program, and a network of manufacturing facilities, sales offices and design centers in key markets throughout North America, Europe, and the Asia Pacific regions.

---

## Pavotek

[www.pavotek.com.tr/en](http://www.pavotek.com.tr/en)

We are providing OEM and ODM products (card, product and system) to medium and large-scale local and foreign companies leaders of their sector and in need of electronic solutions; offering services for the redesign and pricing of the current products; adding value to all companies we are working with and playing an active role in rapid growth of the Turkish Economy. Pavo is one of the few Turkish companies which focus on "Research-Development" concept in our country and the neighboring region striving to transit from

industrial society to information society, which allocate nearly the whole amount of its annual income to the R&D and which work with practically all sectors.

---

## Peracutus

[www.peracutus.com](http://www.peracutus.com)

Peracutus BV mission is closing the gap between technology and the medical world. The new developed product, the Peracutus Aqua Meth, is a device to assess lymphedema and related diseases. It is a patented Volumetry measuring device and recently validated in the university hospital Maastricht MUMC+. This innovative device integrates these two worlds and will be a source for new methods and insights in the treatment of lymphedema. We were nominated for the InnovAward from Limburg &Co. It is likely that this measuring method will become a new standard in monitoring the response of Lymphedema treatment.

---

## Philips Design

[www.philips.com/design](http://www.philips.com/design)

Philips Design is a recognized global leader in people-centric design, applying creative expertise to ensure that innovations are meaningful and that the Philips brand experience is preferable and consistent across all its touch-points. Through intensive collaboration and co-creation with stakeholders in and outside Philips, Philips Design aims to understand people's true needs and desires and translates these into relevant solutions and experiences that create value for people and business. Its creative force is comprised of designers across various disciplines like: product, environment, communication, service and digital, as well as various trend and people research capabilities who work from branch studios in Europe, North America and Asia.

---

## Philips Group Mergers, Acquisitions and Divestments

[www.philips.com](http://www.philips.com)

Philips Group Mergers, Acquisitions and Divestments (GMAD) is the value-maximizing resource at the heart of Philips portfolio management, driving forward the Group strategy through the end2end execution of both acquisitions and divestments.

---

## Philips Health Systems

[www.philips.com](http://www.philips.com)

Philips Health Systems Commercial Supply Chain has been located in HTC 37 at the Campus since the end of October 2012. With its 300 employees, Global Commercial Supply Chain in Eindhoven consists of several global functions and also includes the Customer Fulfillment Center EMEA. The organization takes care of all customer orders realized by the Market Groups located in the EMEA regions. At the same time, by working very closely together with the operational entities in the businesses, they support alignment in the Health Systems operational chain between both the Business Innovation Units and the Markets.

---

## Philips Healthworks

[www.healthworks.philips.com](http://www.healthworks.philips.com)

Philips HealthWorks is a next generation health technology accelerator. We work with exceptional startups and entrepreneurs who share our passionate drive to turn great ideas into innovations that can transform personal health and professional healthcare worldwide. Philips HealthWorks provides unrivalled access to the capabilities of a global healthcare technology leader, from an outstanding network of experts, investors and healthcare partners, four global innovation hubs, and crucial seed funding, to a world-class, healthcare-compliant technology platform. Through our Startup Program we help entrepreneurs and startups build, test, de-risk and scale health technology ideas to breakthrough in the health technology world.

---

## Philips Innovation Services

[www.innovationservices.philips.com/htce](http://www.innovationservices.philips.com/htce)

Do you need a fully functional prototype fast? Does a tough technical issue require specialist technical expertise? Or maybe you simply need specific test and measurement instrumentation. Pleased to meet you! As an innovation service provider, we want you to be successful in delivering your innovations to the market, where they can matter to your customers and society as a whole. Our mission is simple: to accelerate your innovation. Inside and outside Philips, from start-up to multinational. As a High Tech Campus Eindhoven neighbor, it is very easy for you to come by and access our expertise and facilities.

---

## Philips Intellectual Property & Standards

[www.ip.philips.com](http://www.ip.philips.com)

Philips IP&S proactively pursues the creation of new intellectual property in close co-operation with Philips' operating businesses and Philips Group Innovation. Philips IP&S is a leading industrial IP organization providing world-class IP solutions to Philips' businesses to support their growth, competitiveness and profitability. Philips' IP portfolio currently consists of 79,000 patent rights, 49,000 trademarks, 86,000 design rights and 4,400 domain names. Philips files approximately 1,700 patents per year, with a strong focus on the growth areas in health and wellbeing. Philips IP&S participates in the setting of standards to create new business opportunities. Philips IP&S has a strong global presence with offices in the major countries, which allows it to create and exploit the Philips IP portfolio close to its internal and external customers.

---

## Philips Lighting

[www.lighting.philips.com](http://www.lighting.philips.com)

Philips Lighting, a global leader in lighting products, systems and services, delivers innovations that unlock business value, providing rich user experiences that help improve lives. Serving professional and consumer markets, we lead the industry in leveraging the Internet of Things to transform homes, buildings and urban spaces. With 2016 sales of EUR 7.1 billion, we have approximately 34,000 employees in over 70 countries.

---

## Philips Personal Health

[www.philips.com](http://www.philips.com)

Philips Innovation Site Eindhoven (ISE) does medical-compliant product development, industrialization and market quality monitoring for Mother & Child Care, Skin Care, and Connected Health Devices. It was established 01/01/2011 and has now 300+ employees. The Skin Care team develops the Lumea, VisaCare and VisaPure ranges. The M&CC team develops the products for the leading "AVENT" brand. The Connected Health Devices team develops connected personal health measurement devices like the Philips Health watch. We are driven by improving the lives of ladies, mothers, babies and people that worry on their health by blending consumer and technology insights. We are a blend of consumer researchers, hard-core product developers, engineers and purchasers.

---

## Philips Procurement

[www.philips.com](http://www.philips.com)

Philips Procurement has been located mainly in HTC 5 since January 2010. With approximately 90 employees at the Campus, the team is responsible for bringing Philips innovation and sustainable competitive cost advantage through a strong partnership with suppliers around the world. Philips Procurement works across all business, functions and markets to ensure the Procurement competence drives all Philips negotiations end-to-end.

---

## Philips Research

[www.research.philips.com](http://www.research.philips.com)

Philips Research, founded in 1914, helps improve the quality of countless lives by developing meaningful and often breakthrough integrated solutions based on people's needs. Operating at the front end of the innovation process, our expertise covers areas ranging from identifying and interpreting trends to ideation, technology and concept creation and – if required – first-of-a-kind product development. Philips Research has research facilities in Germany, the Netherlands, France, the United Kingdom, India, China, Russia and the U.S.

---

## PlasmaCure

[www.plasmacure.nl](http://www.plasmacure.nl)

Med tech start-up Plasmacure is dedicated to help people who suffer from chronic wounds, and will bring to market an innovative treatment method to heal these wounds. Current focus is on the diabetic foot wounds. Treatment is quick, painless and decreases the risk of amputation. The treatment is based on cold plasma technology that originates from the TU/e. We will develop it further with our development partners and suppliers to a CE marked product. Plasmacure is the 2016 winner of the Blue Tulip, the prestigious Accenture Innovation Award in the category Health and Wellbeing.

---

## PNA Group

[www.pna-group.com](http://www.pna-group.com)

PNA is world leader regarding integrated business modeling. We offer world-class business analyses, consulting and development services, workshops/training, and knowledge repository software. Our clients include ABN AMRO, ADP, Belastingdienst, CBS, Erasmus University Rotterdam, the European Space Agency, Immigration and Naturalisation Service, MoneYou and VGZ. PNA is active member and representative for Europe of the Object Management Group. We are (co-)author and (co-)contributor of world standards (BPMN, SBVR, DMN and cogNIAM®). We achieve effective Business-IT alignment by an integral approach of all aspects of knowledge. We capture and integrate process, data, business rules, semantics and communication patterns into a single knowledge model. Business benefits: Shorter time-to-market, lower initial investment, lower cost-of-change, 100% sustainable and predictable.

---

## PQ+

[www.pq-partner.nl](http://www.pq-partner.nl)

We Solve Quality Problems. Problems in design, production and processes stimulate the professionals of PQ+ to generate new ideas to find solutions. With a team, that is passionate about technology and a strong drive to perform, we always have the right expertise to help you solve challenging problems. All team members have hands-on engineering experience and can immediately relate to the problems of your engineers. With a broad experience in semiconductor, automotive and medical equipment industry we are ready to support your goals with senior technical experts, project managers (PMI), development managers, interim assignments and training. In addition, we provide full service for certification and maintenance for multiple standards/regulations.

---

## Profit Consulting

[www.profitnederland.nl](http://www.profitnederland.nl)

Profit Consulting, founded in 1998, is a technical software house that distinguishes itself by knowledge and ample experience in the field of technical and embedded software development. Key markets where Profit Consulting is active in are: Automotive, Healthcare, Semiconductors, High Tech Systems & Equipment (strongly related to Mechatronics). Other domains of expertise are algorithm development, vision, imaging, control systems, healthtech, complex mobile apps. Profit Consulting operates on a high level

and stimulates her employees to constantly develop themselves on technical and personal level. Because of their specialism Profit Consulting is an important partner for various OEM-partners on national and international level.

---

## Profitap

[www.profitap.com](http://www.profitap.com)

Profitap develops and manufactures high-quality fiber optic and copper TAPs, and Ethernet field testers. We provide complete, comprehensive visibility and access to your network 24-7-365. Thanks to Profitap's non-intrusive and fail-safe design, our TAPs ensure the utmost security for both your network and monitoring appliances. With products such as the ProfiShark 1G, we've fused high performance with portability to create exclusive, industry leading monitoring solutions. We are developing our products to be front-runners in an industry where the definition of excellence is constantly being challenged.

---

## Proshore

[www.proshore.nl](http://www.proshore.nl)

Proshore helps businesses to take a next digital step through design and development of online platforms and digital services. Our experienced cross-functional teams, enable online visions through solutions like platforms, online applications and apps that strengthen business goals and ambitions. We offer our partnership to organisations that want to make smart moves towards a powerful online environment.

---

## Prosuma

[www.prosuma.nl](http://www.prosuma.nl)

Prosuma Subsidiemanagement is a fully dedicated grants consultancy company, located at the High Tech Campus in Eindhoven, providing customized services in the field of acquiring grants for entrepreneurs, industrial and high tech companies in the Netherlands. Since 2000 we have served both national and international companies to optimize, secure and manage their R&D costs effectively. ---

## PTC

[www.ptc.com](http://www.ptc.com)

PTC (Nasdaq: PMTC) enables manufacturers to achieve maximum value from their product strategies with software and services designed to optimize key business processes throughout the entire product lifecycle – from conception and design to sourcing and service. PTC's integral solution portfolio enables customers to unleash product innovation, improve collaboration and ensure product data integrity within engineering and across the enterprise, supply chain and service partner networks. Founded in 1985, PTC employs over 6,000 professionals serving more than 27,000 customers worldwide.

---

## QNH Consulting

[www.qnh.eu](http://www.qnh.eu)

QNH helps organisations to improve and adjust the course of its operational management. We accomplish this by deploying smart IT solutions. We combine new technologies with existing ones and we advise, develop, implement and manage. Our solutions focus on optimising the provision of information, implementing and managing IT architectures and applications including mobile applications. The right information available everywhere and at all times, access to the right applications and the most optimal workplaces - always based on future-ready platform. Professionalism, enthusiasm and collaboration are our core values. We collaborate with customers, partners and colleagues on the best IT solutions by connecting people and processes with the latest technologies, achieving mutual successes and learning from one another. This is what we call Partnership in IT.

---

## Real1ze

[www.real1ze.nl](http://www.real1ze.nl)

Real1ze is an ambitious game-changer in the world of innovation and grants. With a deep passion for technology our energetic team arranges funding for our clients, from start-ups to the top R&D players in the Netherlands. Through smart process optimization and customized software tools we enable our clients to real1ze their innovative ideas and projects.

---

## REM Surface Engineering Limited

[www.remchem.com](http://www.remchem.com)

REM Surface Engineering is active in various markets: Medical, Aerospace & Defense, Automotive & Off-Highway, Decorative, Power Generation and Additive Manufacturing. With our highly skilled personnel we bring the vast experience and knowledge in surface finishing for over 65 years. Our ISF® technology removes microscopic peaks from metal surfaces which results in a very smooth, non-directional however textured finish applicable to high alloyed steels, stainless steels and Titanium. ISF® is used to enhance durability, increase wear resistance, it reduces friction and is economically beneficial, etc. Our PhD. chemists and mechanical engineers constantly work on various AM- and R&D projects.

---

## Reset Yourself

[www.resetyourself.com](http://www.resetyourself.com)

Reset Yourself helps people crack their secret code to healthy living through the Reset Hair Analysis. Combining state of the art technology with nutritional balancing science, Reset Yourself uncovers each person's unique biochemical blueprint and provides a targeted nutrition, lifestyle and supplement plan based on the individual results. We bridge the gap between knowledge and execution. Not a diet, not an exercise program, Reset Yourself is a true customized lifestyle approach based on each person's unique individuality, designed to help you reset yourself and achieve optimal and sustainable health, performance and productivity.

---

## Richtek Europe BV

[www.richtek.com](http://www.richtek.com)

Richtek is a world-leading power management IC design house. We are singularly focused on delivering the world's most competitive power management IC products, the most comprehensive solutions, as well as the most quality services. Since our start in 1998, Richtek has quickly become one of the world's leading providers of power management IC solutions. We have achieved this not only by delivering a new generation of cost-effective power management ICs, but also providing clients with customized system design-in services and supports. These solutions have already made Richtek one of the world's largest suppliers of power management ICs in the fields of desktop computer mainboards, handsets, digital still cameras, networked communication equipments, large-sized flat panel displays, notebooks, LED Lighting, and much more.

---

## Roima Intelligence Inc

[www.roimaint.com](http://www.roimaint.com)

Roima Intelligence is a strongly growing Profitability Partner to the leading technology and food & beverage companies, but also a vantage point to the whole industry. Our solutions help our customers achieve a more cost efficient production and supply chain, maintain and increase the quality and innovativeness of their products and thus generate more added value to their customers. Roima brand was born in 2014 - yet we have deep roots and decades of experience within industry. Our innovative attitude and desire to grow was recognized in 2016 when Roima Intelligence was selected as a winner for Red Herring's 2016 Top 100 Global award, a prestigious recognition honoring the year's most audacious and far-reaching private technology companies.

---

## Salvia BioElectronics B.V.

[www.salvianeuro.com](http://www.salvianeuro.com)

Salvia is a young innovative start-up company active in the emerging field of "BioElectronics" that is inspired by biology and electronics to provide innovative therapeutic solutions. The name Salvia is derived from the Latin word salvere, which means "to stay healthy". Bioelectronics are smart devices that use mild electrical impulses to influence nerve activity and thereby treat disease. We are driven to deliver bioelectronic solutions that restore health for people suffering from severe neurologic disorders. Our ambition is to make these novel therapies widely accessible.

---

## ScaleUp Capital

[www.scaleupcapital.nl](http://www.scaleupcapital.nl)

ScaleUp Capital has built a successful track record in matching innovative SME-entrepreneurs who are in need of funding with Smart Money. Often, to fully reach their ambitions, entrepreneurs seek more than just a financial aid. The right investor can provide additional value. Whether it is their network, knowledge and/or experience, our goal is to establish an agreement that suits both the entrepreneur and the investor by making optimal use of the Smart in Smart Money. As a result, both the entrepreneur and the investor can truly realize their ambitions.

---

## SEAC

[www.seac.cc](http://www.seac.cc)

The Solar Energy Application Community (SEAC) in The Netherlands was created in 2012 as a cooperation between ECN, TNO and Holland Solar. The Mission of SEAC is:

- To stimulate research and development in the field of solar energy systems and applications;
- To stimulate the business activities in The Netherlands and its neighboring regions in the field of innovative solar energy systems and applications.

What can SEAC do for you?

- We advise companies who are interested in innovation in the field of solar energy systems and applications;
  - We execute field testing, benchmarking and techno-financial modeling in projects;
  - We initiate and support cooperation projects between companies and knowledge institutes.
- 

## Sentech

[www.sentech.nl](http://www.sentech.nl)

Sentech thinks and acts with a view to meeting the customer's needs. We are The sensor integrators, specialized to supply integrated sensor solutions tailored to fit the specific purpose for which the customer will use them. Sentech regularly delivers assembled sensors ready for immediate service, pre-fitted with casing, plug, cable or connector. The total sensor product will often embody ingenious solutions to specific problems that came to light during the customer's everyday operations. At Sentech, we don't merely supply products, we advise, integrate and assemble.

---

## Shimano

[www.shimano.com](http://www.shimano.com)

Shimano Europe is a member of the global Team Shimano and along with our world-renowned subsidiaries we offer consumers outstanding cycling, fishing and rowing products and apparel. Our mission is to be an excellent supplier and a valuable partner for all our customers in the European bicycle, fishing tackle and rowing industry, to create consumer demand for Shimano and Shimano-owned products, and to be the 'eyes, ears and mouth' of the global Team Shimano in Europe. Shimano is proud of its staff, diversity in talent, interests and backgrounds. We strongly believe in promoting health and happiness through the enjoyment of the world around us.

---

## Simac ICT Nederland

[www.simac.com](http://www.simac.com)

Simac supplies and maintains advanced technology to improve the business processes of medium-size and large organizations. To do this, the Simac (private owned) companies offer a wide range of solutions, products and services for ICT infrastructure and applications. We offer this generic know-how on a market-wide basis. In this way we work together with our customers and suppliers on innovative, integrated solutions for specific domains, including education, government, finance, business services and industry. Simac holds a leadership position in a constantly changing market, which means we regard the design, implementation and operation of technology as a continuous process.

---

## Sirius Medical Systems B.V.

[www.sirius-medical.com](http://www.sirius-medical.com)

Sirius Medical Systems is a spin-out from the Netherlands Cancer Institute and Twente University. We are driven to bring surgical treatment for cancer patients to the next level. Our vision is that precisely targeted and minimally invasive surgical interventions may fully remove cancer tissue and leave surrounding healthy tissue unaffected, yielding optimal patient outcomes at overall lower costs.

---

## SMART Photonics BV

[www.smartphotonics.nl](http://www.smartphotonics.nl)

SMART Photonics, located in Eindhoven The Netherlands, offers its customers an expert team with a proven track record in III-V R&D and production. We help our customers to become successful with their products. We offer them our knowledge, experience and the environment to change their ideas into concepts and - in a minimum of time - create from those concepts released products for manufacturing. We provide those III-V foundry services in a dedicated state-of-the-art III-V ecosystem.

---

## Solliance

[www.solliance.eu](http://www.solliance.eu)

Solliance is a partnership of R&D organizations from the Netherlands, Belgium and Germany working in thin film photovoltaic solar energy (TFPV). In order to strengthen the region's position as a world player we create the required synergy by consolidating and coordinating activities of 250 researchers in industry, at research institutes and universities. Various state-of-the-art laboratories and pilot production lines are jointly used for dedicated research programs which are executed in close cooperation with the solar business community. Are you interested in participation?

---

## Sparckel

[www.sparckel.nl](http://www.sparckel.nl)

Sparckel is part of Fronthouse Innovative Concepts. This is a techno start-up activity. Our ambition is to serve customers internationally with the healthy aspects of light within the next two years. Sparckel is based on a strong believe that we can and should live healthier. By bringing the rhythm of sunlight into the comfort of our homes and working environment, we will trigger life's energy. We will benefit with an optimal mental condition giving sharpness (decelerated dementia), concentration, and fitness during the day and better sleep at night. Sparckel is free floor standing luminaire with state-of-the-art LED technology and programmable controls.

---

## Sqoony EMEA

[www.sqoony.com](http://www.sqoony.com)

SQOONY has developed a unique video platform for mobile devices which combines controlled delivery with easy integration to apps. SQOONY allows you to create your own video platform without the hassle of having the infrastructure at zero investment costs. Sqoony offers you the possibility to create your own business model. No more buffering, waiting or loading due to our 100% availability even without an Internet connection! Sqoony's solution is designed for publishing

video clips directly to mobile devices, including a native pre- and post-role, and embedded 'personal' call-to-action functionality, at designated times without streaming. Create and control your own business model with your own mobile video platform.

---

## ST Microelectronics

[www.st.com](http://www.st.com)

STMicroelectronics is one of the world's largest semiconductor companies, offering one of the industry's broadest product portfolios. ST serves customers across the spectrum of electronics applications with innovative semiconductor solutions by leveraging its vast array of technologies, design expertise and combination of intellectual property portfolio, strategic partnerships and manufacturing strength. ST has a strong focus on delivering solutions that reduce energy consumption at the point of use in domestic and industrial applications; all aspects of security and data protection; and a growing presence in the emerging advanced healthcare market and is among the world leaders in many different fields, including semiconductors for industrial applications, inkjet print heads, MEMS (Micro-Electro-Mechanical Systems) for portable and consumer devices, MPEG decoders and smartcard chips, automotive integrated circuits, computer peripherals and wireless. The ST group has approx. 53,000 employees, 14 main manufacturing sites and advanced research and development centers in 10 countries with sales offices worldwide.

---

## Synopsys

[www.synopsys.com](http://www.synopsys.com)

Synopsys, Inc. (Nasdaq:SNPS) is the Silicon to Software™ partner for innovative companies developing the electronic products and software applications we rely on every day. As the world's 15th largest software company, Synopsys has a long history of being a global leader in electronic design automation (EDA) and semiconductor IP, and is also growing its leadership in software quality and security solutions. Whether you're a system-on-chip (SoC) designer creating advanced semiconductors, or a software developer writing applications that require the highest quality and security, Synopsys has the solutions needed to deliver innovative, high-quality, secure products. The company is headquartered in Mountain View, California, and has approximately 103 offices located throughout North America, Europe, Japan, the Pacific Rim, India, and Israel.

---

## Tech to Market

[www.tech-to-market.com](http://www.tech-to-market.com)

TECH-TO-MARKET provides marketing and communications support to the segments Industry, Technology and Education. Our interim project managers are specialized in building bridges between technology and commerce whilst employing the latest digital marketing insights and automation tools. We offer interim- and change-management for short-term projects, become a flexible extension of your marketing team for long-term support, or deliver results as a full-service agency for your on- and offline marketing and communications projects. With our solid experience in the international technology sector – from start-ups to multi-national matrix organizations –, and our dedicated network of suppliers and partners, we're able to deliver a one-stop-shop for your business.

---

## Techwave Consulting B.V.

[www.techwave.net](http://www.techwave.net)

Techwave is a global end-to-end IT services and solutions company headquartered in Exton, Pennsylvania, United States with local presence in APAC, Europe, MENA and South Africa. Our Global Delivery Centre is located in India. We are a trusted strategic business partner providing value-added IT services through co-innovation and thought leadership. Techwave serves a wide range of clients on a gamut of services, from Big Data Analytics to IT Infrastructure Management. We are ranked #9 among the fastest growing companies in the region by the Philadelphia Business Journal and #15 under IT services domain in USA by the 'Inc. 500' magazine.

---

## Tecnotion

[www.tecnotion.com](http://www.tecnotion.com)

Tecnotion is the global authority on direct drive motor technology. As a former part of Philips, we are the world's only unbundled manufacturer of linear and torque motors. We specialize solely in the development and production of direct drive motors, which allows us to provide expertise, customer service and product quality that are unmatched by other direct drive manufacturers. Linear motors can be used in a wide range of production processes and are especially useful for the semiconductor, electronics, display, machine tool, factory automation and robotics industries, as well as providing solutions for printing and for cutting various materials with pinpoint accuracy. Tecnotion has a global presence, with production plants in The Netherlands and China and local representation around the world. This ensures short delivery times and high-quality support, regardless of your location. When you do business with Tecnotion, you have a team of highly skilled sales and application engineers at your disposal to assist you throughout the process, from your initial prototype all the way to the application of our products and beyond.

---

## TEN Flecs

[www.tenflecs.com](http://www.tenflecs.com)

TEN Flecs is a contract manufacturing facility for thin-film integrated circuits and backplanes based on IGZO and organic TFT technologies. Target applications are NFC and RFID tags, sensors (fingerprint, X-Ray, temperature), displays (LCD, OLED and EPD) and logic (memory, CMOS). TEN FLECS is GEN2.5 manufacturing facility, which transfers to industry the decades of applied R&D in thin-film electronics from IMEC (Belgium), Holst Centre (Netherlands) and FlexEnable (UK). TEN Flecs kick-off is planned to Q2 2019 with a capacity of 10,000 sqm of TFTs a year. TEN Flecs manufacturing line is in Troitsk, Moscow area, Russia

---

## TNO

[www.tno.nl](http://www.tno.nl)

TNO connects people and knowledge to create innovations that boost the sustainable competitive strength of industry and well-being of society. This is our mission and it is what drives us, the 3,000 professionals at TNO, in our work every day.

---

## TMC

<https://tmc-employeurship.com/>

TMC is a unique collection of self-starting, highly skilled and almost self-employed technical professionals. Our unparalleled Employeurship model offers engineers from all backgrounds the comforts of employment and the opportunities of entrepreneurship. This creates a challenging, stimulating environment. Because we believe that people drive technology. We are an international high tech consultancy company, comprised of Employeurs with more than 30 nationalities who provide services to customers all over the world. We excel in research, development and engineering in nearly twenty fields of expertise.

---

## Texas Instruments

[www.ti.com](http://www.ti.com)

Texas Instruments (TI) is a global technology company and one of the world's largest chip manufacturers. TI develops analog and digital signal processing along with RF and DLP® semiconductor technologies that enable customers from consumers to industry to make electronic products that have better performance, greater efficiency, more precision and mobility, and improved quality.

## TU/e, Eindhoven University of Technology

[www.tue.nl](http://www.tue.nl)

Eindhoven University of Technology is a research-driven, design-oriented university of technology with a strong international focus. The university was founded in 1956, and has around 8,500 students and 3,000 staff. TU/e has defined strategic areas focusing on the societal challenges in Energy, Health and Smart Mobility. With advanced quality research, the university contributes to the progress of technical sciences and thus the development of technological innovations. The TU/e puts emphasis on knowledge valorisation: research results are translated into successful innovations and serve as a basis for creating new products, processes and enterprises.

## TWICE Eindhoven

[www.twice.nl](http://www.twice.nl)

Building high tech success. TWICE offers a special stimulating environment for young, innovative technology companies with growth potential. Our shareholders – Brabantse Ontwikkelings Maatschappij (BOM), municipality of Eindhoven, Eindhoven University of Technology, Brainport Development and Rabobank Eindhoven-Veldhoven - have joined forces in order to ensure that your business can be successful at TWICE in Brainport Eindhoven region. In four thematically unified housing formulas. Strategically positioned in the heart of the absolute high tech hotspots in the Brainport region: Eindhoven University of Technology and High Tech Campus Eindhoven, TWICE makes your business visible in the High Tech community.

---

## Usono

[www.usono.com](http://www.usono.com)

Usono facilitates medical staff in their work to provide better care with smart ultrasound solutions. We radically change the ultrasound

market by improving and innovating the way ultrasound is used. Ultrasound is a very well-known image modality. In general ultrasound transducers are freely moved during procedures however other procedures require the ultrasound transducer to be fixated mostly in cardiology and radiology departments.

---

## vanderPoloffice

[www.conceptualthinking.eu](http://www.conceptualthinking.eu)

vanderPoloffice is a multidisciplinary creative consultancy with over 25 years' experience in consulting, teaching and training. We provide corporate skills training in ideation and R&D as well as product development & strategic design solutions. We do this using a step by step process we developed called Conceptual Thinking that trains the individual creative brain. The secret lies in combining the power of abstract/creative thinking with the control of a structured process. Conceptual Thinking allows you to focus inspiration and 'turn it on' when you need it coupled with a business oriented result driven outcome to spark more ideas faster, analyse complex projects and identify key issues turning ideas into game-changing concepts.

---

## Van der Laan Legal Consultancy

[www.luukvanderlaan.eu](http://www.luukvanderlaan.eu)

Luuk van der Laan is a hands on international business lawyer, with focus on contracting in the fields of elementary research, (joint) R&D, product development, manufacturing, supply, marketing and sales/distribution, funded project cooperation, M&A and competition law. He also has a technical background, so for him High Tech Campus Eindhoven is one big "toy shop". He provides a solid, but also practical and business focused, approach, with short response times and deadlines being met. Just give an upfront call and drop in (on the house) for an initial meet and greet and to test your direct or long term legal business needs.

---

## V.E.D.S. Veeren Electronic Design Solutions

[www.veds.nl](http://www.veds.nl)

Quality PCB designs delivered in time. Established in 1994 Veeren Electronic Design Solutions (V.E.D.S.) is able to deal with all aspects of PCB design from prototype to mass production. All design areas are covered by the latest technology e.g. Embedded Passive, HDI. Using state of the art CAD and MCAD systems combined with the design engineers' in depth knowledge of manufacturing and assembly processes, EMC and signal integrity issues, V.E.D.S. offers a PCB design service that meets the customers specifications the first time right. A close cooperation between Electronics Engineers, Designers, Bare Board Manufacturers, Test and Assembly facilities is realised. Problem areas are identified before they become an issue. Recommendations are made that could possibly increase manufacturing or assembly yields on prototyping and volume products. This approach shortens the design cycle, reducing the time to market, which in turn reduces the overall cost of a project, leading to a more cost effective product. V.E.D.S BV operates according to ISO-9001-2000 requirements.

---

## Vention

<http://www.fransprototyping.nl/>

Vention is the engineering company that can turn your idea into reality. Vention develops electronics, embedded software, apps and mechatronic solutions. We focus on fast and flexible development to bring your product to the market quickly. Vention designs products ranging from IoT consumer products to high-performance RF solution, medical devices and automotive products. Vention is a one-stop shop for product development: starting from a concept we develop, prototype, test, build and even help certify your product. Give us a call if you are looking for an R&D partner to bring your ideas to life.

---

## Vision and Action

[www.vision-actions.com/en/](http://www.vision-actions.com/en/)

We are a group of multinational professionals in technology development and product marketing. In our VISION, sustainable development of society can be prosperous only through integration of Social, Environmental and Economic benefits all together. We conduct concrete ACTION on our vision by promoting innovations through technology co-development activities and social programs. ---

## ZENS

[www.makezens.com](http://www.makezens.com)

ZENS is a young and innovative company, established right at the heart of Europe's technology region: Eindhoven, where revolutionary products and technologies (e.g. CD, Blu-Ray etc.) were developed. ZENS focuses on the development, production and marketing of products that not only make sense, but also make life easy for consumers. Recognising the potential of induction charging, ZENS fully supports the Qi standard and is the first company in Europe to market a series of wireless charging solutions based on this standard. Innovation and design are key in all of ZENS's products.

---

## Zipp Labs

[www.zipplabs.com](http://www.zipplabs.com)

Zipp Labs is a technology company specialized in the field of Delivery/Logistics and related fields with advanced wireless patented "sensor-to-web" concepts as primary platforms. The Zipp Labs team is composed of entrepreneurial developers with vast experience in mobile connectivity and the internet of things, and has developed a wide range of potentially very successful business opportunities. The core development team has extensive experience in developing technically advanced connectivity products in, amongst others, Silicon Valley. The Zipp Labs concepts have game changing potential and the first platforms have been launched in 2015.

---

## Zzapps

[www.zzapps.nl](http://www.zzapps.nl)

Zzapps specializes in online software solutions to make the unthinkable possible. We are curious and enthusiastic about the needs of our customers and use this approach to create online software solutions that the customer has often not thought about. By combining technologies of the Google platform, we are able to create solutions even on low budgets. Our products are consistently of the highest quality and are provided with the expert support of our software consultants. Zzapps also focuses on implementing G Suite: a collection of business applications that can be used independently of device and location. We help prepare businesses for a new, modern and efficient way of working that fits this era.
